# Carpentries Workshop Data Collection

Title	Carpentries Workshop Data Collection
Subtitle	A template for tidy data about workshops, instructors, learners, and helpers
Copyright	2022 Jamene Brooks-Kieffer
Access rights	Creative Commons Attribution (CC-BY) 4.0
Variable Count	11

## WorkshopSlug - Workshop Slug

Туре	Text
Description	A unique identifier for a Carpentries workshop composed of the workshop date, location, curriculum or topic, and workshop format: yyyy-mm-dd-location-curriculum-format  This identifier is used as the GitHub repository name when creating a Carpentries workshop GitHub site.
Example for a full in-person workshop	2022-02-15-ku-dc
Example for a single topic in- person workshop	2021-09-24-ku-py
Example for a full online workshop	2022-02-15-ku-dc-online
Example for a single topic online workshop	2021-09-24-ku-py-online

# WorkshopURL - Workshop URL

Туре	Text
Description	The URL for the rendered GitHub pages website for a specific Carpentries
	workshop. Format is https://githubusername.github.io/workshop-slug

### Fname - First Name

Туре	Text
Description	The first name (given name) of a participant in a Carpentries workshop.

### Lname - Last Name

Туре	Text
Description	The last name (family name) of a participant in a Carpentries workshop.

Email - Email Address	
Туре	Text
Description	The email address of a participant in a Carpentries workshop.

Institution - Institution Name	
Text	
The name of the institution with which a Carpentries workshop participant is affiliated. This is often the name of a college or university, but can also be a research institute or other public or private employer.  Use the institution's canonical name, not an abbreviation.	

SchoolOrDept - School or Department	
Туре	Text
Description	The name of a school or department with which a Carpentries workshop participant has an affiliation. This field can also be used for the name of a research institute when the institute is affiliated with an academic institution. For public or private employers unaffiliated with an academic institution, or where the department name is unknown, repeat the name of the Institution.

WorkshopRole - Workshop Role	
Туре	Code
Description	Enter the role played by the participant during the workshop. If a participant played multiple roles (e.g.: Instructor and Helper), enter one role per row for the participant. A participant playing multiple roles will have multiple rows per workshop.

#### Workshop Role

Host	The workshop host arranges logistics for the workshop. The Host often also serves as the Organizer.
Organizer	The organizer arranges technical details for the workshop. The Organizer often also serves as the Host.

Instructor	An instructor teaches part or all of a workshop lesson. Workshops frequently have more than one instructor.
Helper	A helper assists learners with questions and technical problems during a workshop lesson. Workshops usually have more than one helper per workshop lesson.
Learner	A learner registers for the workshop in order to learn the lesson material.

WorkshopTopic - Workshop Topic	
Туре	Code
Description	An individual lesson covered during a Carpentries workshop. A workshop can consist of one or more lessons. Use the Carpentries code for the lesson or, for
	lessons in the Carpentries Incubator, use the repository name.

Top-10-FAIR	Library Carpentry Top 10 FAIR Data & Software
	Things

TopicDate - Topic Date	
Туре	Date
Description	The date an individual lesson topic is taught during the workshop period. Use the date format YYYYMMDD. Excel should not convert this number to an Excel-formatted date, but if it does, change the column data type to Text to prevent this from happening.
Date Format	YYYYMMDD

AttendanceStatus - Attendance Status	
Туре	Code
Description	The attendance action taken by a participant during a workshop topic. For participants in workshop roles Organizer, Host, Instructor, and Helper, record each participant's action for each lesson. For example, an Instructor who teaches two topics will receive an entry for each topic.  For participants in the Learner role, record attendance for each topic if possible.

#### **Attendance Status**

Hosted	Attendance status for the workshop Host
Organized	Attendance status for the workshop Organizer
Instructed	Attendance status for a workshop Instructor
Helped	Attendance status for a workshop Helper
NoShow	Attendance status for a workshop Learner who did not attend any of a workshop topic and did not cancel their registration
Canceled	Attendance status for a workshop Learner who canceled their registration prior to the workshop topic
Withdrew	Attendance status for a workshop Learner who canceled their registration after the workshop topic began
